Pune, Maharashtra, India

Summary

I am a final-year B.Tech student specializing in Cyber Security & Forensics with hands-on experience in network security, vulnerability assessment, and threat monitoring. My knowledge includes SIEM, networking concepts, OWASP Top 10, encryption techniques, and incident response. I am actively building skills in penetration testing and security analysis, with a strong focus on identifying vulnerabilities and strengthening system security. I stay updated with the latest cybersecurity trends and continuously work on improving my practical and analytical capabilities.

Education

B.Tech in Cybersecurity & Forensics – MIT School of Computing, Pune (Expected 2026)

Projects

- IP Look-Up
 - Developed a Python-based tool that provides network intelligence, including resolving domain names into IP addresses and retrieving geolocation information like country, city, latitude, longitude, ISP, and ASN. Integrated external IP intelligence services and added features like private IP detection, DNS resolution, and more.
- Web Vulnerability Scanner
 - Developed a Command Line Interface tool Python-based Web Vulnerability Scanner that performs automated crawling and perform SQLi attacks on the target website.
- SOC Dashboard
 - Developing a SOC dashboard using Linux (Ubuntu) and Splunk for real-time network monitoring and analysis. Integrating tshark through pipeline-based data ingestion to capture and forward network traffic, enabling visualization and investigation of IP-specific conversations directly with Splunk. Focused on enhancing threat detection, log analysis, and incident response capabilities.

Technical Skills

Tools – Burp Suite, Nmap, Splunk, Wireshark, Metasploit

Framework – OWASP TOP 10, MITRE ATT&CK (Basic), Cyber Kill Chain

Programming Language – Bash Scripting, Python, C++

Operating system – Kali Linux, Windows

Courses

Vulnerability Analysis & Penetration Testing, Bio-Metrics Security, Cloud Security, Reverse Engineering & Malware Analysis

Achievements

- Best Project Award at MIT ADT IdeaSpark'24 for innovative project development and creative problem-solving among competing student teams
- 2nd Place, Badminton 47th and 50th Foundation Day, Dr. Balasaheb Sawant Konkan Krushi Vidyapeeth, Dapoli
- Disciplinary Co-Head, MIT ADT ACES Club: Led event discipline, managed teams, and ensured seamless execution of large-scale college activities.

Certifications

- Certified Ethical Hacking(v12) – LearnkartS
- Cyber Threat Management – Cisco
- Foundations of Cybersecurity - Google
- Cisco Certified Support Technician Cybersecurity (CCST Cybersecurity) – Cisco
- Hands-on Introduction to Linux Commands and Shell Scripting - IBM
- Ethical Hacking with Kali Linux – IBM
